

Mukil Rajeev

Senior Software Engineer

+1 512-550-0081 | mukilr@gmail.com | mukil.xyz | Austin, TX

SUMMARY

Software Engineer with 14+ years of experience in distributed systems, cloud infrastructure, backend architecture, and Agentic AI across Oracle, Alation, and Gartner. Delivered **\$200K+ in annual cost savings**, **80% faster incident resolution through GenAI**, and supported **\$1M+ in annual recurring revenue retention**. Proficient in Python, Java, Go, cloud-native platforms, AI-driven automation, and performance optimization.

EXPERIENCE

Oracle - Individual Contributor - Lvl 3

JUNE 2025 - Present

- Contribute to Oracle Cloud Infrastructure's Multicloud engineering platform, supporting Oracle Database@Azure and integration between OCI and Microsoft Azure.
- Develop and support backend resource-provider functionality and cloud infrastructure services for highly available database platforms.
- Engineered automated cleanup of unused Azure resources, eliminating unnecessary infrastructure expenditure and generating **\$200K+ in annual savings**.
- Developed **10+ reusable AI skills** supporting code analysis, debugging, engineering automation, and operational troubleshooting.
- Applied OpenAI Codex with Model Context Protocol (MCP) integrations to enable AI agents to perform log investigation and root-cause analysis, achieving **80% faster on-call ticket resolution**.
- Designed and developed multiple AI agents to automate repetitive engineering workflows, **reducing daily task execution time by 60%** and improving developer productivity and operational efficiency.
- Integrated Azure Proximity Placement Groups to optimize resource placement, **reducing latency between customer resources by up to 33%** and improving application performance.

Alation - Senior Software Engineer

AUGUST 2018 - MAY 2025

- Built scalable Python and Java backend applications for enterprise data cataloging and intelligence, supporting the processing and management of large volumes of enterprise data.
- Owned the entire **Compose** feature of Alation, driving end-to-end development, feature enhancements, maintenance, and technical improvements for SQL query authoring and execution.
- Designed and developed APIs and distributed backend services for data-intensive enterprise applications.
- Re-engineered legacy Java applications to increase storage and transmission efficiency by 150% to 300% via gRPC.
- Architected and implemented an OAuth 2.0-based authentication and authorization framework from the ground up, enabling secure enterprise integrations and supporting the retention of customers representing **\$1M+ in annual recurring revenue**.
- Earned accolades in 4 of 6 company-organized hackathons during tenure, demonstrating innovative problem-solving and rapid prototyping capabilities.

Gartner - Software Engineer II

JULY 2014 - JULY 2018

- Developed technical proofs of concept and contributed to their evolution into production-ready enterprise solutions.
- Designed and developed reusable integration frameworks connecting a product under development with other internal Gartner platforms.
- Designed and developed internal globalization tooling, **accelerating globalization coverage across the product by 400%** and significantly improving localization efficiency and development productivity.
- Built a framework for scheduling, managing, and deploying tasks across multi-node environments.
- Contributed to backend architecture, troubleshooting, automation, and application performance improvements.
- Received the **Most Productive Team Member Award (2016)**.

Cognizant - Programmer Analyst

AUGUST 2010 - JULY 2012

- Developed and supported enterprise applications for two major client-facing projects.
- Became a subject matter expert for one application, contributing to development, issue analysis, and production troubleshooting.
- Received the **Best Newcomer Award (2011)**.

SKILLS

- **Backend & Distributed Systems:** Python, Java, Go, REST APIs, gRPC, Protocol Buffers, Django, Gin, GORM, Kafka
- **Cloud & Infrastructure:** Oracle Cloud Infrastructure (OCI), Microsoft Azure, AWS, Docker, Terraform, GitHub Actions, CI/CD
- **Security & Platform Engineering:** OAuth 2.0, Authentication & Authorization, Enterprise Integrations, Application Security, API Design
- **AI Engineering:** OpenAI, Codex, Claude, Amazon Bedrock, AI Agents, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), AI-Assisted Development
- **Data Platforms:** PostgreSQL, SQL Server, Redis, MongoDB, Cassandra
- **Performance & Diagnostics:** Java Flight Recorder, HProf, Production Troubleshooting, Performance Optimization
- **Additional Languages & Frameworks:** JavaScript, TypeScript, Shell Scripting, React, Angular

ACCOLADES

- Best Newcomer — 2011
- Most Productive Team Member — 2016
- Consistently ranked in the top tier for performance appraisals

EDUCATION

- **Master of Technology - Cyber Security** - Amrita University AUGUST 2012 - JULY 2014
- **Bachelor of Technology - Information Technology** - Amrita University JULY 2006 - JULY 2010
